

High School Mathematics Faculty

[Sequoiah School](#), an independent school founded in Pasadena, California in 1958, launched an innovative high school program in September of 2016. As an extension of our K-8 program, students are guided through the deep intellectual exploration of content following a student-centered, problem-based pedagogy that offers relevant contexts for exploration and opportunities for application. Furthermore, the high school program builds upon the changemaking work practiced in the K-8 program by offering a program for [Social Innovation](#). Finally, field studies is a hallmark of a Sequoyah education that extends interdisciplinary teaching and learning as students and teachers travel around California, the Southwest, the Pacific Northwest, and Latin America to explore the natural world and engage with a variety of communities. The high school program also offers international expeditions.

We are currently accepting applications for the fall 2022.
